	Saddle:	High Quality Black PU	
	Accessories:	Pump/ Lock/ Dynamo	
<b>BICYCLE FOR MEN</b>			

**BICYCLE FOR WOMEN ( keep the same technical specification with men in terms of tarde mark (PHONEX) and consider the mentioned variations)**

The design of women specific bicycles is such that the distance between the seat post and the handle bar is reduced to ensure a comfortable riding position for women.

Most women have narrower shoulders when compared to men. The ideal positioning for one's arms while holding the handle bar is shoulder width. Women specific bicycles are designed to have shorter handle bars to address this vital requirement.

Women tend to have wider sit bones and hence require a broader saddle

Most women have smaller hands. This could make the reach, i.e. the space between the shifters and the grip on the handle bar, far off to shift gears comfortably while riding. Women specific bicycles are designed in such a way that the reach is smaller and hence easier to shift gears while pedaling.

women tend to be smaller built and lighter than men. The frame of Women specific bicycles is designed with materials that make it lighter and easier to handle.
